- Figma Essentials for User Interface and User Experience UI/UX – Udemy
- Get Started with Figma – Coursera
- UI/UX – Great Learning
- Google Cloud Computing Foundation – NPTEL
- Data Science Foundations – Great Learning
- Social Network Analysis – NPTEL
- Introduction to Generative AI – United Latino Students Association
- Software Development and Agile Software Process – Infosys Springboard

### Beyond Work

- Smart India Hackathon (SIH) participant.
- GDSC PR member - organized hackathons, seminars and workshops.
- Led "Best Manager" event at SREC-CSE Symposium.
- State Level Karate (Kumite) Champion.
- Multiple awards in art, music, dance, debate and role-play.

### Connected With

- AnitaB.org
- Google Developer Student Club (GDSC) – PR Executive
- National Service Scheme (NSS)

### Learning & Development

- **Salesforce:** Exploring Trailhead modules and beginner-level CRM workflows
- **Coding:** Learning Java, HTML/CSS, C, and Python through online courses and small projects
- **Goal:** Combine design with development and CRM platforms to become a versatile UI/UX + Tech Intern

### Profile

Aspiring UI/UX Designer with hands-on experience in wireframing, prototyping, and user research using Figma. Currently expanding skillset into front-end development (Java, HTML/CSS) and Salesforce CRM to bridge the gap between design and implementation. Passionate about designing intuitive digital experiences and eager to contribute to innovative, user-centered projects.

### Work Experience

#### UI UX Design Intern

Centre for Development of Advanced Computing (C-DAC) | Chennai, India  
*June 2024 - November 2024*

- Created interactive wireframes and prototypes, enhancing user engagement by 25%.
- Conducted user research and usability testing, identifying and resolving pain points to improve product usability.
- Collaborated with cross-functional teams to align design strategies with business goals, ensuring seamless product development.

#### UI UX Design Intern

Walinn's Innovation

*December 2023 - January 2024*

- Designed intuitive UI components, reducing development time by 30% and improving design efficiency.
- Collected and analyzed user feedback, implementing data-driven design improvements that enhanced usability.

### Projects

#### Profanity Detector (Mini Project II)

Tools: Python, HTML/CSS (Learning Phase)

Developed a tool to filter abusive language in text inputs. Designed and tested user-friendly interface and backend logic using basic Python and web components.

#### Automatic Detection of Abusive Comments (Mini Project I):

Tools: Python (Team Collaboration)

Developed MVP for a social platform to detect offensive comments. Encouraged team collaboration and met tight deadlines.
